## Summary

Staff Software Engineer at Adobe with 8+ years of experience architecting complex systems, mentoring engineers, and leading teams that build successful customer-focused enterprise products. Full-stack product engineer with deep experience across AI-first creative workflows, complex frontends, creative tooling, extensibility, cloud services, data integrations, and developer platforms. Known for turning ambiguous product opportunities into shipped enterprise experiences, partnering across product/design/marketing, and communicating technical direction through public talks and writing.

## Core Strengths

- Engineering leadership and cross-functional execution
- AI-first enterprise product development
- Full-stack web application architecture
- Creative technology and marketing workflow automation
- Developer extensibility, APIs, and integration platforms
- Cloud services, microservices, and event-driven systems
- Technical communication, public speaking, and developer education

## Experience

### Adobe - Senior Software Engineer (L5), GenStudio Create Canvas

Feb 2025 - Present

- Lead the Horizon Canvas initiative for Adobe GenStudio for Performance Marketing, architecting advanced editing capabilities on a multi-user infinite canvas for enterprise creative workflows.
- Delivered the foundational GenStudio canvas architecture on Horizon, including MVC architecture, chrome field display, multi-artboard layout, and bi-directional messaging between Horizon and the GenStudio micro-frontend.
- Architected and implemented a template caching service that improved canvas load time by 4x, helping customers work faster in large creative editing flows.
- Mentored 6+ engineers across the Horizon Canvas initiative, helping teammates lead major system designs and onboarding partner teams to contribute to the canvas platform.
- Built the GenStudio for Performance Marketing integration for brand-governed ChatGPT ads, enabling enterprise marketers to assemble approved ad creative for a new conversational AI performance channel.
- Delivered the foundation for GenStudio UI add-ons and led the system design for third-party DAM extensibility, enabling partners such as Bynder and customers such as AT&T; to connect their DAMs to GenStudio.
- Co-presented "A Developer's Guide: Extending Adobe GenStudio" at Adobe Summit 2025 to 900+ virtual attendees, covering real-world GenStudio extensibility patterns and developer workflows.

### Adobe - Software Engineer IV, GenStudio Insights and AEM Innovation

Aug 2022 - Feb 2025

- Led and architected the backend for GenStudio Insights, a new enterprise product that centralizes performance marketing data and content intelligence across ad channels.
- Built services and data integrations that pulled ad performance data from Meta, LinkedIn, and other channels into GenStudio dashboards, helping customers understand how creative assets perform.
- Coordinated delivery across Ad Cloud, GenStudio Romania, GenStudio Austin, and Intelligent Services teams to launch GenStudio Insights for Performance Marketing in time for Adobe MAX.
- Led feature architecture for future GenStudio integrations across connection points such as Meta, Google DV360, and TikTok.

- Helped plan, architect, and implement Assets Pool, an AEM innovation project focused on helping customers find assets across Adobe and non-Adobe repositories.
- Prototyped asset identity and visually similar image/video search using custom CAI models, Python lambdas, PyTorch, TensorFlow, and scikit-learn.
- Presented Asset Catalog goals and architecture to 60+ engineers and contributed to Adobe's Open Source Committee.

## **Adobe - Software Engineer III, AEM Asset Compute and Content Automation**

Feb 2021 - Aug 2022

- Built AEM as a Cloud Service asset processing capabilities across Node.js microservices, Adobe I/O Runtime actions, and React-based user experiences.
- Co-led runtime optimization work for a backend per-client throttling service that used request complexity weighting to protect Adobe I/O Runtime resources and reduce operational risk.
- Co-led PDF Preview for AEM, integrating Document Cloud APIs so customers could view, comment on, and annotate uploaded documents directly in AEM.
- Built the Sensei Listens Alpha prototype with Intelligent Services and DX UI teams, including serverless actions for validation, training, polling, inferencing, and long-running workflow orchestration.
- Mentored a 12-week summer intern through a successful prototype for scrubbable video thumbnail preview.
- Spoke at industry and product events including Geekle Node.js Global Conference, Tech Summit, and developer panels.

## **Adobe - Software Engineer II, AEM as a Cloud Service**

Jul 2019 - Feb 2021

- Built features for a multi-tenant, scalable, extensible cloud service for processing assets in AEM as a Cloud Service.
- Developed backend services and full-stack tooling for asset processing workflows, helping customers automate how creative and document assets move through AEM.
- Presented at Adobe Developers Live on extending AEM as a Cloud Service through asset microservices and Adobe App Builder.

## **Adobe - Software Engineering Intern**

May 2018 - Jun 2019

- Collaborated with the engineering team to design and develop a cloud-based asset processing service.
- Created a proof of concept for integrating Adobe artificial intelligence services into the asset processing flow.
- Built a React single-page developer tool for testing and using the service.

## **Selected Projects**

### **GenStudio ChatGPT Ads Integration**

Built a GenStudio for Performance Marketing integration for brand-governed ChatGPT ads, bringing enterprise approval workflows and brand-safe creative assembly into a new conversational AI ad channel.

### **GenStudio Create Canvas**

Lead engineering work on creative tooling that helps enterprise marketers generate, customize, and scale brand-governed content.

### **Claude Skills**

Created reusable Claude Code skills for AI-assisted workflows, including patterns for connecting agents to real tools, authenticated APIs, and repeatable development processes.

### **Personal Website**

Built and maintain a custom Gatsby and React Spectrum portfolio site showcasing product launches, speaking engagements, writing, and AI workflow experiments.

## **Writing and Speaking**

- "I Built My Wedding Website with Claude" - Medium
- "Giving AI Access to Okta-Protected APIs" - Medium
- "Using Proxyquire with Nested Dependencies" - Medium
- Adobe Summit 2025 - "A Developer's Guide: Extending Adobe GenStudio"
- API World - Content and Commerce AI APIs
- Adobe Developers Live - AEM as a Cloud Service Extensions

## **Education**

## **University of California, Berkeley**

B.A. Applied Mathematics, focus in Computer Science

## **Technologies**

JavaScript, React, Gatsby, Node.js, SCSS, Adobe React Spectrum, Adobe GenStudio, Adobe Experience Manager as a Cloud Service, Adobe App Builder, APIs, cloud services, microservices, Customer Journey Analytics, Meta and LinkedIn integrations, Claude Code, AI-assisted development workflows.
